

The factor of understanding is brought about the "CUSTODIANS". The custodians give legends and facts as well as riddles. Then my family members acquire knowledge and wisdom about the stories of long ago. That factor makes me to love my family.

protects from external influences: I love my family because it is protected against external influences. Influences like drinking alcohol, smoking opium, smoking cigarettes, and they are not exposed to world conditions like prostitution, adultery, early marriages, theft, and fornication. more so, they are protected against others political influences such as Terrorism, Insurgencies, and from forming up rebellious groups.

Raising up a child: children are raised up in a good manner. children are taught how to honour parents, and they are raised up in a christian foundation, and they are taught the christians norms, beliefs and values. They are told to participate in work because the bible encourages every one to work.

Aid to make decision: There is decision making in my family Each individual decides what to do more especially in issues of economic planning. They are economists where by each person is having his or her business to sustain him or her. Decision making depends on one's intellectual ability.
